<b>Total</b>		<b>€ 11,094,805</b>
Total Grants		€ 3,080,800
Total Loans		€ 7,764,005

## Project Description

The WBIF project [Reconstruction and Modernisation of the River Port of Br?ko Phase 1](#) will include the construction and arrangement of the port plateau, the purchase of a new crane, the reconstruction of the access road from the port to Bijeljinska cesta as well as the industrial railway from the port to Br?ko Novo railway station. The works will first start on the reconstruction of the plateau, which will be performed by the company Bijeljina and Prijedor putevi, selected at a public tender.

Mechanization in the port of Br?ko is mostly dilapidated, and the portal cranes are more than 50 years old. The project also includes the procurement of a new crane with a carrying capacity of up to 16 tons (three times larger than the current one), which will contribute to increasing the handling capacity of goods to 150 to 200 tons per hour.
